Product Description: TuffStrand® OSB

TuffStrand® is an oriented strand board panel.

LEED Product Information

LEED is a trademark of the U.S. Green Building Council. The use of TuffStrand® OSB can contribute to obtaining points toward LEED project certification as established by the U.S. Green Building Council under the following categories:

Materials and Resources Credit MR5, Regional Materials

To qualify towards this credit, projects must be within a 500-mile radius of the below manufacturing location:

Harvesting Location

Louisiana

Manufacturing Location(s)

Oakdale, LA

Materials and Resources Credit MR7, Certified Wood

TuffStrand® qualifies as "FSC Mixed Credit" under Chain-of-Custody Certificate Number SW-COC-000695 with 97 percent wood content.

Indoor Air Quality Credit IEQ4.4, Low-Emitting Materials: Composite Wood and Agrifiber Products

RoyOMartin certifies that TuffStrand® is manufactured using adhesives that do not emit urea-formaldehyde.

Respectfully Submitted,

RoyOMartin - OSB Division

TuffStrand® OSB

Materials and Resources Credit MR5, Regional Materials

Harvesting Location:

Louisiana

Manufacturing Location:

Oakdale, Louisiana

If the project falls within a 500-mile radius, denoted above, TuffStrand® will contribute to credit MR5, regional materials. For specific information on manufacturing location compared to product radius, please contact info@royomartin.com.

Materials and Resources Credit MR7, Certified Wood

TuffStrand® qualifies as “FSC Mixed Credit” under Chain-of-Custody Certificate Number SW-COC-000695 with 97 percent wood content.

Indoor Air Quality Credit IEQ4.4, Low-Emitting Materials: Composite Wood and Agrifiber Products

RoyOMartin certifies that TuffStrand® is manufactured using adhesives that do not emit urea-formaldehyde. If TuffStrand® is to be used inside the weatherproofing barrier for the project, the product will contribute to the completion of Credit IEQ4.1, no added urea-formaldehyde resins.

RoyOMartin-OSB Division is CoC/CW certified for FSC-Mixed Southern Yellow Pine OSB Panels, as well as FSC-Pure.

Our wood for the Oakdale, Louisiana, mill comes from two sources: (1) RoyOMartin's FSC-Forest Management (FM) certified fee land forests for our FSC-Pure component and (2) via external gateway deliveries, which pass through our FSC Controlled Wood (CW) Chain of Custody (CoC) procedures. All external gateway is certified to FSC Standards 40-004 and 40-005 for Controlled Wood Chain of Custody. Certificate numbers for RoyOMartin's OSB Division are: SW-CoC-000695 and SW-CW-000695.

As previously stated, our FSC-Pure component of the FSC-Mixed product comes from our FSC-FM certified fee lands. These lands are all located within the state of Louisiana, and more specifically in the following parishes: Acadia, Allen, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Catahoula, DeSoto, Evangeline, Grant, Jackson, LaSalle, Lincoln, Natchitoches, Ouachita, Rapides, Red River, Sabine, Saint Landry, Union, Vernon, Webster, and Winn. In any given time frame, fee land sourcing of materials for our OSB division can come from any or all of these parishes.

For the time period beginning January 1, 2010, and extending through the present, the FSC-Pure component of our FSC-Mixed Southern Yellow Pine OSB panels has averaged > 64%. This time frame should cover any OSB that would be currently available for purchase.

The CW component of our FSC-Mixed Southern Yellow Pine OSB panels for 2010-2011 has come from the following Louisiana parishes: Acadia, Allen, Avoyelles, Beauregard, Calcasieu, Evangeline, Grant, Jefferson Davis, Lafayette, Rapides, Sabine, Saint Landry, and Vernon. As part of our CoC procedures for controlled wood, these raw materials—while coming from a variety of landowners and forests—undergo a strict risk assessment, which is a part of the CoC/CW certification to FSC standards 40-004 and 40-005.

Page 2 of this document shows RoyOMartin's product group schedule for OSB, exactly as it appears on our corporate website, illustrating the input material categories. The product group schedule, shown in the FSC template format, shows no recycled materials listed in our input materials categories. This has recently been validated via our annual FSC audit, which occurred in May 2010. Also a part of the product group schedule is the physical address of our Oakdale, Louisiana, OSB facility.

For additional information about FSC-certified OSB panels, contact:

Scott Bertrand
FSC CoC Coordinator
