

MEC Triple Pass Dryers

MEC Triple Pass Dryers for strand moisture removal. One dryer is 12' (3.66m) diameter by 50' (15.2m) length and the other dryer dimension is 12' (3.66m) diameter by 48' (14.6m) in length . Each dryer requires approximately 1,500 BTUs to evaporate one pound of water from the strands. The MEC Dryers come complete with inlet air lock, trunions, drive, stainless steel ducting, cyclone, outlet air lock and I.D lock fan, Drying capabilities are 20,000lbs per hour with 2% moisture content. We currently have two dryers remaining.

This information is provided in good faith to describe assets available for sale “as is, where is, without warranty”.
